---

## Summary

Results-oriented Support Specialist with 2+ years of experience in technical infrastructure management. Computer Science graduate with First-Class Honours and experience spanning AI evaluation, Python, SQL, data analysis, machine learning, system monitoring and technical operations. Experienced in evaluating generative AI outputs, investigating system anomalies, working with operational data and developing data-driven solutions. Strong foundation in data pipelines, APIs, databases, Git, Docker and Linux, with a strong interest in building AI-ready data systems, knowledge retrieval and RAG applications

## Work Experience

### Network Operations Center (NOC) Engineer

November 2024 – Present

OPTASIA, ATHENS, GREECE

- Monitor production systems and operational data using Grafana and Nagios, identifying anomalies and supporting system reliability.
- Investigate incidents and perform root-cause analysis across event-driven processes and technical infrastructure.
- Apply structured escalation, incident documentation and SLA-based workflows to resolve technical issues efficiently

### AI Prompt Engineer

May 2024 – November 2024

SCALE OUTLIER, REMOTE

- Designed and refined LLM prompts to improve model performance across complex technical and business tasks.
- Evaluated AI-generated outputs against project benchmarks, identifying quality, reasoning and alignment issues.
- Applied few-shot prompting and structured evaluation to improve consistency and data efficiency.

### Customer Service Representative

January 2020 – January 2022

WEBHELP, EU REMOTE

- Supported B2B clients with technical troubleshooting, order management and issue resolution using **SAP**, **Salesforce** and **Excel**.
- Investigated operational data to identify process bottlenecks and automation opportunities.

### Data Scientist

January 2019 – January 2020

HERALD PUBLISHING HOUSE, REMOTE

- Developed and evaluated machine learning models to analyse customer behaviour and generate business insights.
- Used **Python** for data cleaning, analysis and visualisation, transforming raw data into actionable insights.
- Resolved data-quality issues to improve the reliability of reporting and management decision-making.

Education

**BSc in Computer Science** (First-Class Honours) in Minor in Artificial Intelligence and Machine Learning, First-Class Honours

UNIVERSITY OF LONDON, UK, UK

**Advanced High School Certificate in Minor in STEM, GPA: 3.92**

ZIMSEC, ZIMBABWE, ZIMBABWE

January 2020 – January 2024

January 2014 – January 2017

Technical Skills

**Programming & Data:** Python, SQL, Pandas, NumPy, Data Processing, Data Analysis, Object-Oriented Programming

**AI & Machine Learning:** Machine Learning, Deep Learning, TensorFlow, Scikit-learn, Generative AI, LLMs, Prompt Engineering, Few-Shot Learning, AI Evaluation, RAG Concepts

**Data Engineering:** ETL Concepts, Data Pipelines, Data Cleaning, Data Transformation, Data Quality, Relational Databases, PostgreSQL, MySQL, NoSQL

**APIs & Backend:** REST APIs, API Development, JSON, Django, Flask, Node.js

**DevOps & Infrastructure:** Git, GitHub, Docker, Linux, CI/CD Concepts, Grafana, Prometheus, Nagios, System Monitoring

**Development Practices:** Debugging, Troubleshooting, Root Cause Analysis, Version Control, Testing, Problem Solving

**Enterprise Tools:** SAP, Salesforce, Microsoft Excel, Microsoft Teams, Incident Management, SLA Management

Certifications & Awards

AI in Action — Forage / Vista Equity Partners

József Váradi Scholarship — 2020

Presidential STEM Scholarship — 2018–2020

Greek Language Certificate — University of Athens

Languages

English: Fluent

Greek: Intermediate
